The information was sent for publication, through the agency of the contact person set out above, on August 14, 2026 at 10:00 a.m. CEST.

About Implantica

Implantica is a medtech company focused on bringing advanced implantable technologies into the body to improve patient outcomes and quality of life. The company’s lead product, RefluxStop®, is a CE-marked implant for the treatment of gastroesophageal reflux disease (GERD) with the potential to transform the standard of care in anti-reflux surgery, supported by strong long-term clinical outcomes.

In addition to RefluxStop®, Implantica has developed a broad, patent-protected product pipeline partly incorporating two platform technologies: an eHealth platform designed to enable communication with and remote monitoring of implants inside the body, and a wireless energizing platform designed to wirelessly power implantable devices through intact skin. Treatment could be changed remotely, saving cost for society.

Implantica is listed on Nasdaq First North Premier Growth Market (ticker: IMP A SDB). Visit www.implantica.com for further information.
